Shahzaib Asim

**Hi, I'm Shahzaib
Asim, a student from
Leyton sixth form
college.**

My home
page title

This is my website navigation

My name with
logo

My introduction and link of leyton sixth
form college website

My picture

Annotation home page

- The home page shows my name “SHAHZAIB ASIM” at the top
- This is the main title of my website and helps users know whose portfolio it is
- There is a banner image behind my name
- This this make the page look professional and attractive
- On the left side, there is a navigation menu
- It includes pages like home, about me, cv, unit 1, unit 2, unit 3, unit 13 unit 18 and unit 21
- This help user move easily between pages.

- In the middle, there is a big introduction text:
 - “Hi, I’m Shahzaib Asim, a student at Leyton sixth form college.”
- This give basic information about me.
- I also add link to leyton sixth form college website.
- This allows users to learn more about my college.
- On the right side, there is my picture.
- This makes portfolio more personal and real.
- My name with logo is also shown.

I am a designer-developer who enjoys turning ideas into clean, interactive digital experiences. I mix simple design with solid coding to create smooth and easy-to-use products. I like clear layouts, creativity, and user-friendly flows. I enjoy solving front-end problems and turning ideas into real projects. I am studying for a BTEC Level 2 First Certificate in ICT, where I've completed several assignments that helped build my skills.

This is my introduction paragraph

This have my Tik Tok id linked

This have my snapchat id linked but I don't use

Annotation home page

- On the left side, there is my website navigation menu. It includes pages like Home, About Me, CV, and Unit pages. This helps users easily move between pages. At the top, my name “Shahzaib Asim” is shown with a logo. This shows my identity and personal branding. In the centre, there is my introduction paragraph. It explains that I am a designer-developer student. It also describes my skills, creativity, and interests. This paragraph helps users understand who I am and what I do. Below the paragraph, there is a “Contact Me” section. This section allows users to connect with me easily.

Annotation home page

- I added social media buttons: Facebook
- Instagram
- TikTok
- Snapchat
- WhatsApp
- My Instagram and TikTok IDs are linked. Users can click and visit my profiles. My WhatsApp link is active. Users can directly message me using my number. I also added my email address and phone number. This gives users more ways to contact me. My profile picture is included. This makes the page more personal and professional. The design uses simple colours and clear layout. This makes the page easy to read and user-friendly.

Annotation home page

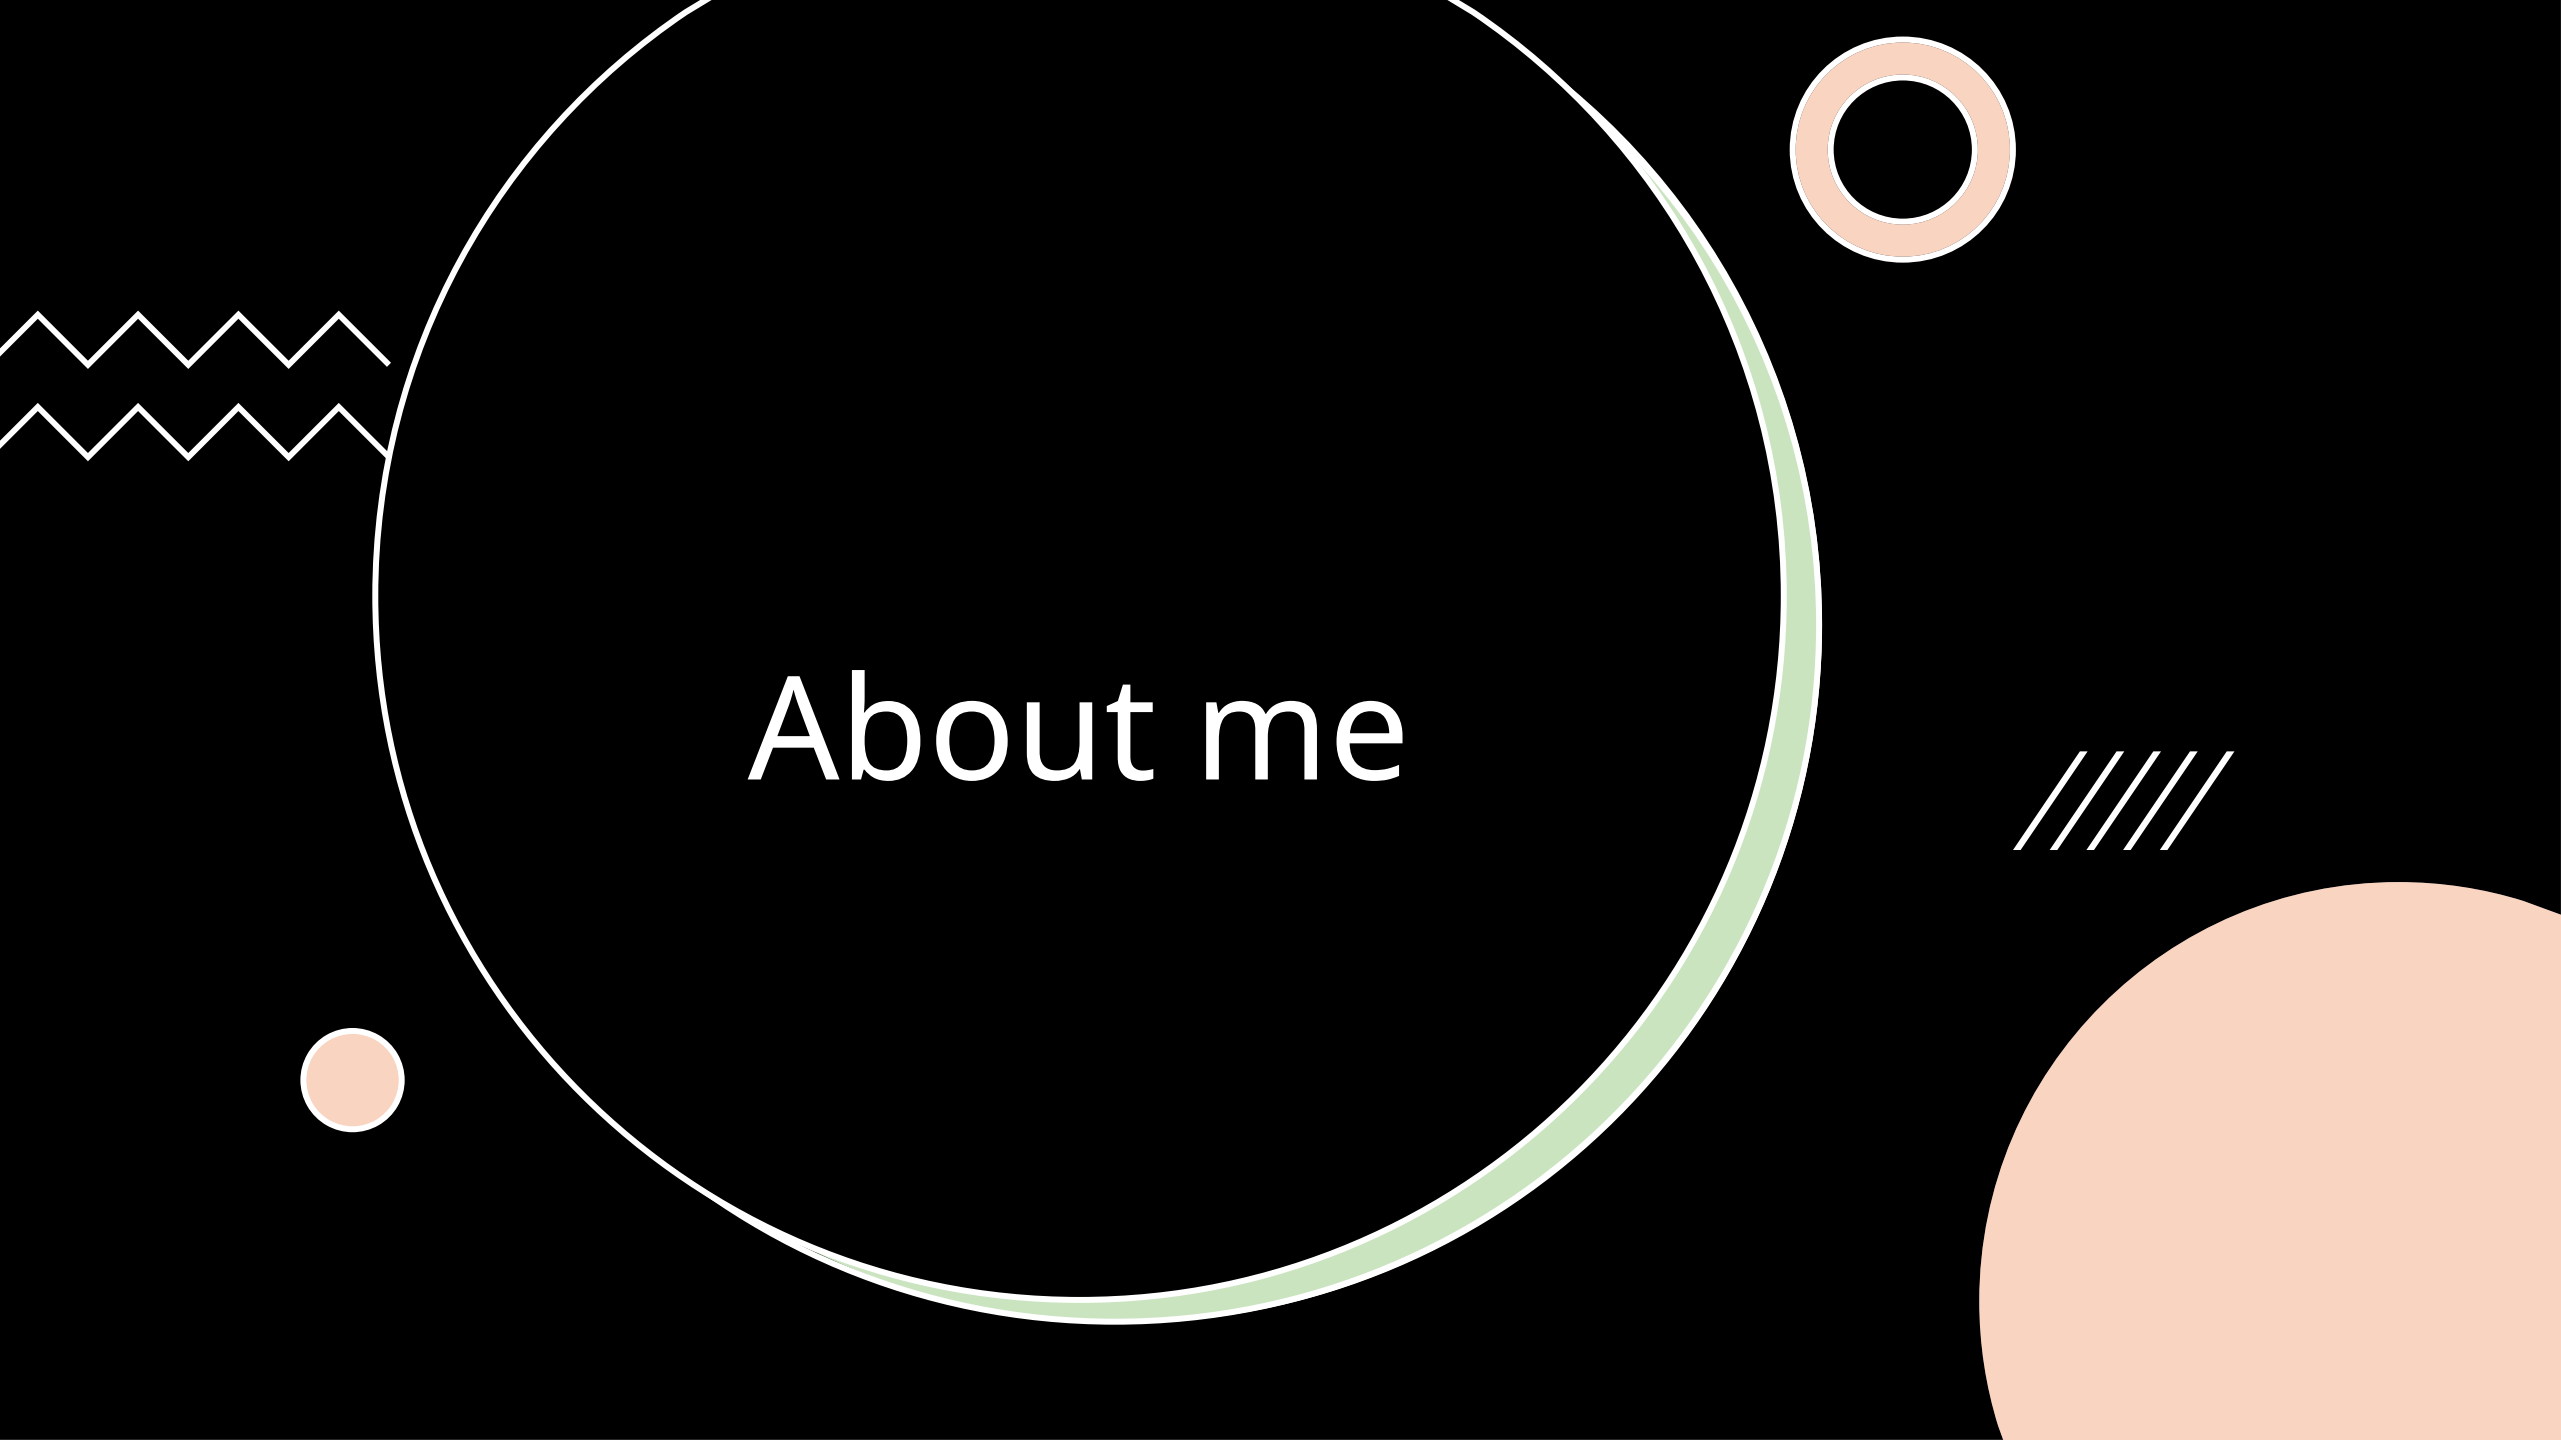

- On the left side, there is my website navigation menu. It includes pages like Home, About Me, CV, Unit 1, Unit 2, Unit 3, Unit 13, Unit 18 and Unit 21. This helps users move easily between pages. At the top left, my name “Shahzaib Asim” with logo is shown. This represents my identity and branding. In the centre top, there is a “Contact Me” section. It tells users they can connect with me using social media or direct contact.

Annotation home page

- There are social media buttons: Facebook (linked to my Facebook ID)
- Instagram (linked to my Instagram ID)
- TikTok (linked to my TikTok ID)
- Snapchat (linked but not used much)
- WhatsApp (direct chat option)
- These buttons help users quickly connect with me online. My email address is clickable. When users click it, it will open their email app. My phone number is also clickable. When users click it, they can call me directly. There is an "About Me" button in the middle. When clicked, it will take users to the About Me page. At the bottom, there is my college information. The Leyton Sixth Form College name is linked to the official website. This helps show my education and makes the portfolio more professional. At the very bottom, there is a footer section.

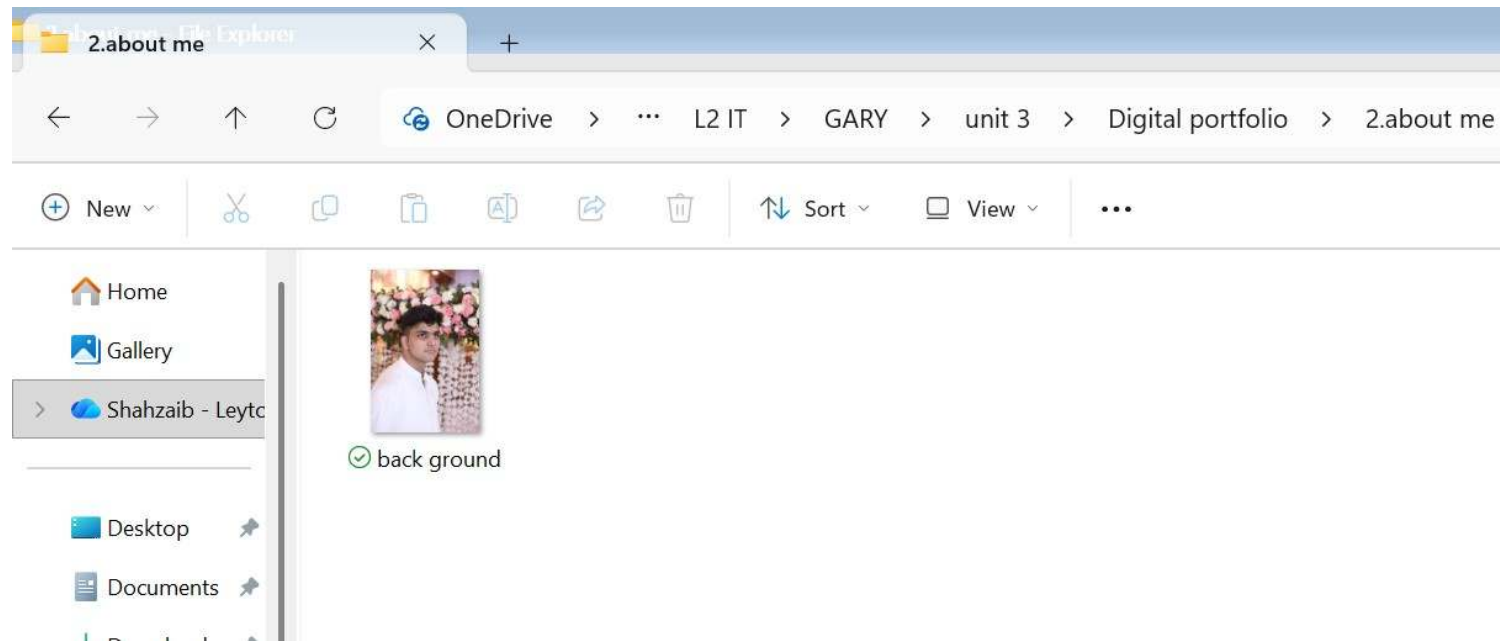

Annotation home page

- It includes:
- My name
- Portfolio title
- Copyright information
- The design uses simple colours and clean layout. This makes the page easy to read and user-friendly.

The background is black and features several abstract geometric elements. A large circle with a thin white outline and a thicker light green inner border is centered on the page. To the left of the circle, there are two horizontal white zigzag lines. Below the circle, on the left, is a small solid light orange circle. In the top right corner, there is a light orange ring. On the right side, there are four parallel white diagonal lines. In the bottom right corner, a large solid light orange circle is partially visible.

Unit 2

Unit 3

assignment unit 3

unit 13

unit 18

unit 21

This digital portfolio has been designed and developed to showcase my skills, knowledge, and coursework completed during my BTEC Level 2 First Certificate in Information & Creative Technology. The purpose of this portfolio is to present my work in a clear, professional, and structured way that can be easily accessed by teachers, assessors, and potential employers.

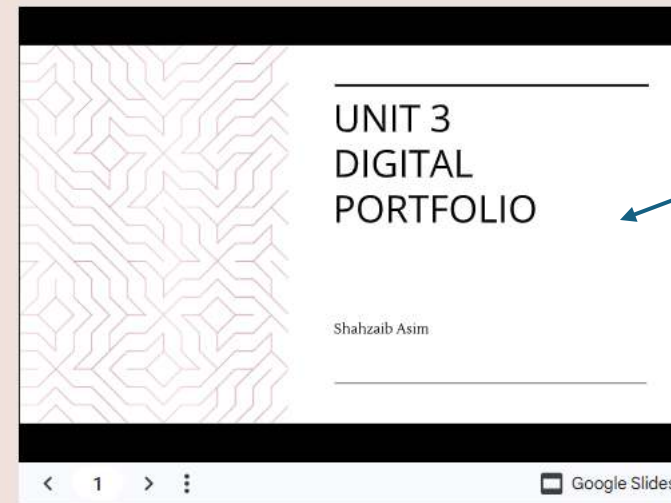

The portfolio includes multiple sections such as Home, About Me, and different Unit pages (Unit 1, Unit 2, Unit 3, Unit 13, Unit 18, and Unit 21). Each page has been carefully designed to display relevant work and evidence for each unit. The layout is consistent across all pages, ensuring easy navigation and a good user experience.

On the Home page, I introduced myself and provided quick access to all sections of the portfolio using navigation buttons. The design is simple but modern, with a clear structure that helps users find information quickly.

The About Me page includes personal information about my background, skills, and interests. This section helps the audience understand who I am and what I aim to achieve in the future.

Each Unit page contains coursework evidence, including assignments, screenshots, and explanations of the tasks completed. I ensured that all content is relevant, organised, and clearly labelled so that the user can understand the work easily.

I also included a Contact section, where users can connect with me through social media platforms such as Facebook, Instagram, TikTok, Snapchat, and WhatsApp, as well as via email. This improves accessibility and allows easy communication.

Unit 13 -Website Development.

Title of unit page

Unit 13 – Website Development includes the assignments I completed using HTML and CSS to plan, design, and develop websites. For example, I created multi-page websites with a navigation menu, header, content sections, and footer, and used CSS to control layout, colours, fonts, and spacing. I improved user experience by designing clear page structures and simple navigation so users could easily find information.

During this unit, I also developed teamwork and communication skills by discussing design ideas with classmates, receiving feedback, and making changes based on suggestions. I explained my design decisions and helped solve layout problems during group discussions. This unit helped me build strong front-end development skills, problem-solving ability, attention to detail, and the confidence to work in a team, which are all important skills for employers.

Small paragraphs
for unit 13

Annotation UNIT 13 page

- On the left side, there is my website navigation.
- It includes different pages like:
Home, About Me, CV, Unit 1, Unit 2, Unit 3, Unit 13, Unit 18, Unit 21
- This helps users move easily around the website.
- At the top left, there is my name with logo (Shahzaib Asim).
- This shows identity and branding of my portfolio.
- At the top centre, there is a title:
“Unit 13 – Website Development”
- This clearly tells the topic of this page.
- There are small paragraphs explaining Unit 13.
- The content explains:
 - I used HTML and CSS to create websites
 - I built multi-page websites
 - I added navigation menu, header, content, and footer
 - I used CSS for colours, fonts, spacing, and layout.

Annotation UNIT 13 page

This unit helped me improve

- Front-end development skills
- Problem-solving skills
- Creativity and design skills
- Attention to detail
- I worked with classmates
- I shared ideas and received feedback
- I improved my communication and teamwork skills
- This page shows my website development skills
- It explains what I learned in Unit 13
- It shows my progress and experience
- The layout is clean and simple
- The text is easy to read
- Information is well organised into paragraphs

Unit 18 -Computational Thinking.

In Unit 18, I created a booklet that explains the key concepts of computational thinking. The booklet focuses on how computational thinking can be used to solve problems by breaking them down into smaller, more manageable parts. It covers techniques such as decomposition, pattern recognition, abstraction, and algorithm design. The goal of this unit was to help me develop the skills to approach problems in a structured and logical way, which is essential in programming and computer science. By creating the booklet, I was able to not only showcase my understanding of these concepts but also present them in a clear and organised manner.

Unit 21 - Technology business

Unit 21 – Technology Business focuses on the process of planning and launching a new technology business. In this unit, I researched how to develop a successful product by analysing customer needs, market trends, and business strategies.

For Unit 21 – Technology Business, I chose the iPhone 18 Pro Max as my product idea. In this project, I researched everything about the product to understand how it could be successful in the technology market. I looked at the target customers, their needs, and what features they expect from a high-end smartphone. I also researched competitors, pricing, and marketing strategies to see how the product could stand out from other phones. This project helped me understand how technology businesses plan, design, and promote products. It also improved my research, planning, and problem-solving skills, and showed how good research can help make a technology product successful.

Word file of assignment
1 and assignment 2

Assignment 1

Successful Product, my chosen product was the iPhone 15 Pro Max. In this assignment, I researched the product in detail to understand why it is successful in the technology market. I looked at the features of the phone, such as design, performance, and camera quality, and how these features meet customer needs. I also researched the target audience, pricing, and competitors to understand what makes the iPhone 15 Pro Max popular. This assignment helped me learn how research, good design, and marketing can make a product successful. It also improved my research, analysis, and understanding of how technology products succeed in business.

Title of assignment 1

Small paragraphs for
unit 21 assignment 1

Assignment 2

In this assignment, I selected the Apple iPhone 18 Pro Max as a prototype technology-based product. The purpose of this work was to carry out primary and secondary market research to evaluate the product's potential success and identify possible improvements before launch.

Title of assignment 1

Secondary research was used to compare the product with a key competitor, the Samsung Galaxy Ultra, focusing on features, benefits, pricing, and unique selling points. Primary research was conducted through an online survey of 10 potential customers, which identified camera quality, battery life, performance, and sustainability as key customer requirements.

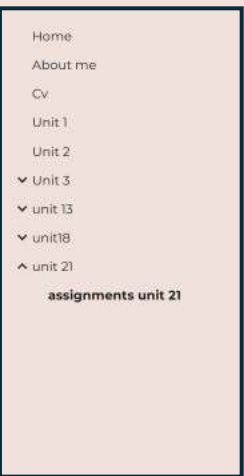

Small paragraphs for
unit 21 assignment 2

Based on the research findings, justified refinements were proposed, including price adjustment, improved battery life, and optional solar charging. Overall, the research

Components	Value/costs	Description
Selling price per unit	£1,399	Competitive price compared with previous analysis
Variable cost per unit	£1,100	Includes components (£1,000), packaging (£50), and transport (£50)
Fixed costs per month	£20,000	Includes research, license, salaries, marketing, and other start-up research costs
Suggested monthly sales	200 units	
Maximum production capacity	300 units	Manufacturing capacity
Calculations: Variable costs		
Formula:	Total Variable costs = Variable cost per unit x Number of units	

Units	revenue	variable cost	fixed cost
0	£0	£0	£20,000
10	£13,990	£11,000	£20,000
20	£27,980	£22,000	£20,000
30	£41,970	£33,000	£20,000
40	£55,960	£44,000	£20,000
50	£69,950	£55,000	£20,000
60	£83,940	£66,000	£20,000

Assignment 3

my chosen product was the iPhone 18 Pro Max. In this assignment, I focused on the business and financial side of making a product successful. I carried out different calculations, including break-even analysis, to understand costs and profit. I made assumptions such as selling 200 units per month, with a selling price of £1399 per unit. I calculated variable costs of £1100 per unit and fixed monthly costs of £20,000. This helped me understand how many units must be sold to cover costs and start making profit. This assignment improved my skills in calculations, planning, and understanding how financial decisions affect a technology business.

Assignment 4

Title of assignment 1

In this assignment, I created a business plan for a new smartphone called the iPhone 18 Pro Max. I analysed the target market, competitors, marketing strategy, and financial planning to understand how the product could be launched successfully. I also calculated the break-even point and examined how changes in price or costs could affect profit. This assignment helped me develop skills in business planning, market research, and financial analysis in the technology industry.

On the left side, your website's navigation bar includes links to Home, About Me, CV, Unit 1, Unit 2, Unit 3, Unit 13, Unit 18, Unit 21

Your page showcases the work done for Unit 21 in multiple assignments. Each section includes a different aspect of the business planning process for the iPhone 18 Pro Max.

Assignment 1 Successful Product

Title *Assignment 1 - Successful Product*

Summary I researched the iPhone 15 Pro Max, focusing on its features like design, performance, and camera quality. The research helped me understand how customer needs, audience, and pricing could affect the product's success. me also explored how effective research, design, and marketing strategies are key to a product's success.

Annotation UNIT 21 page

Assignment 2 Product Analysis and Competitors

Title *Assignment 2 - Product Analysis*

Summary I selected the iPhone 18 Pro Max for product analysis. Primary and secondary market research were conducted to evaluate the product's potential success and identify improvements. I compared the Samsung Galaxy Ultra with the iPhone 18 Pro Max, focusing on features, benefits, pricing, and unique selling points. The research involved a survey to identify customer preferences, like camera quality, battery life, and sustainability.

Annotation UNIT 21 page

Assignment 3 Financial Calculations

Title *Assignment 3 Financial Calculations*

Summary This assignment focused on the business and financial side of the iPhone 18 Pro Max. You carried out calculations such as break-even analysis to understand costs and profit margins. It helped you understand how pricing and selling assumptions impact the business's success, with fixed costs of £20,000 and expected unit sales of 200 per month.

Annotation UNIT 21 page

Assignment 4 Business Plan

Title *Assignment 4 Business Plan*

Summary I created a business plan for the iPhone 18 Pro Max, analysing the target market, competitors, and pricing strategy. I calculated the break-even point and examined how changes in costs or pricing could affect profit margins. This helped me understand how to create a successful business strategy and plan.

BTEC Level 2 Assignment Template
Unit 21: A Technology Business – Learning Aim A
Student Name: Shahzaib Asim
Student Number: S2312202
Teacher: Ayo Kelani
Due Date: 10th October 2023
Introduction
I am just employed as a marketing apprentice at Leyton tech corporation, and my line manager has asked me to investigate how technology-based product or service can become successful. I am going to discuss the unique selling point (USP) of Apple successful product or service. I will review the benefits and explain the features with examples.

iPhone 15 Pro Max – Features & Functions

Features

Face ID Camera System. A17 Pro Chip Apple's fastest processor in 2023. 6.7-inch Super Retina XDR OLED Display with 120Hz refresh rate means the phone can support up to 120 fps (frames per second), which increase gaming experience. Triple Camera System 48MP Wide, Ultra-Wide, 5x Telephoto on Pro Max. iOS 17 Operating System. USB-C Port USB 3.0 speed on Pro models. iPhone 15 pro max battery capacity is 4441 mAh (milliampere-hours). Titanium Body with Ceramic Shield glass with plastic sheet on it to protect. 5G Connectivity

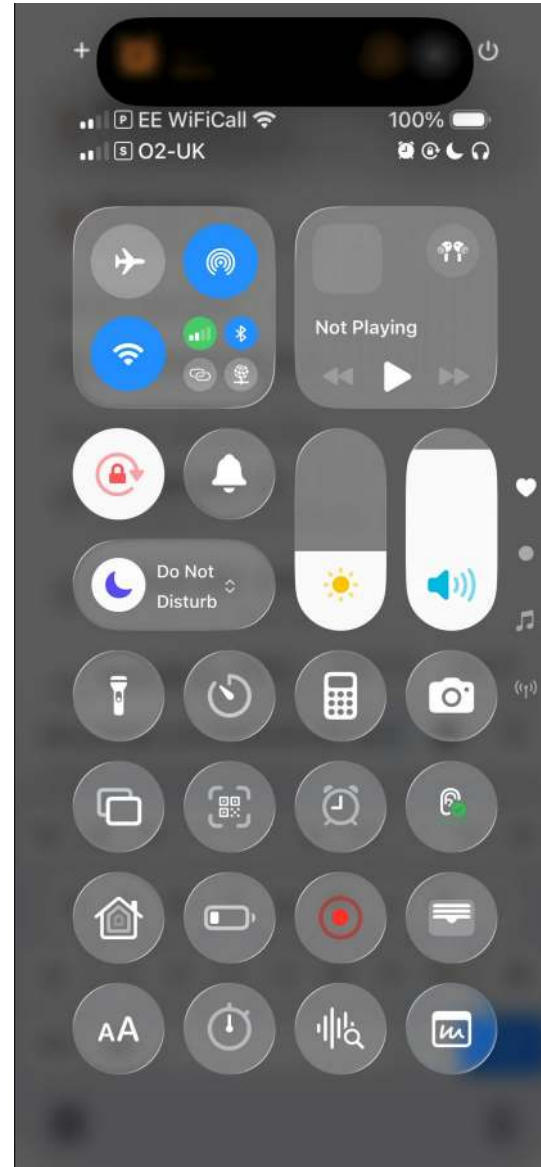

Functions

This product is a perfect example of modern technology because it uses tools like Face ID, a powerful A17 Pro chip, 5G internet, and a professional camera system, all inside one device.

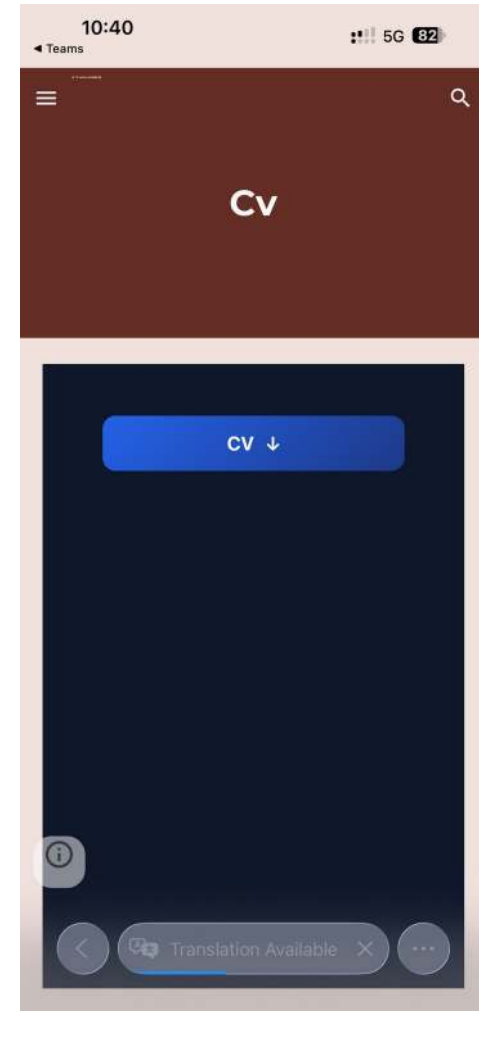

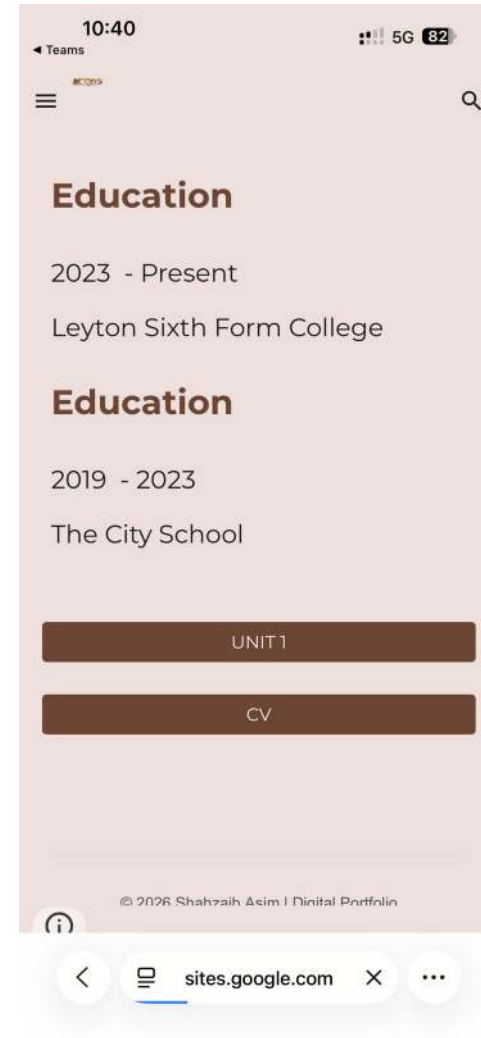

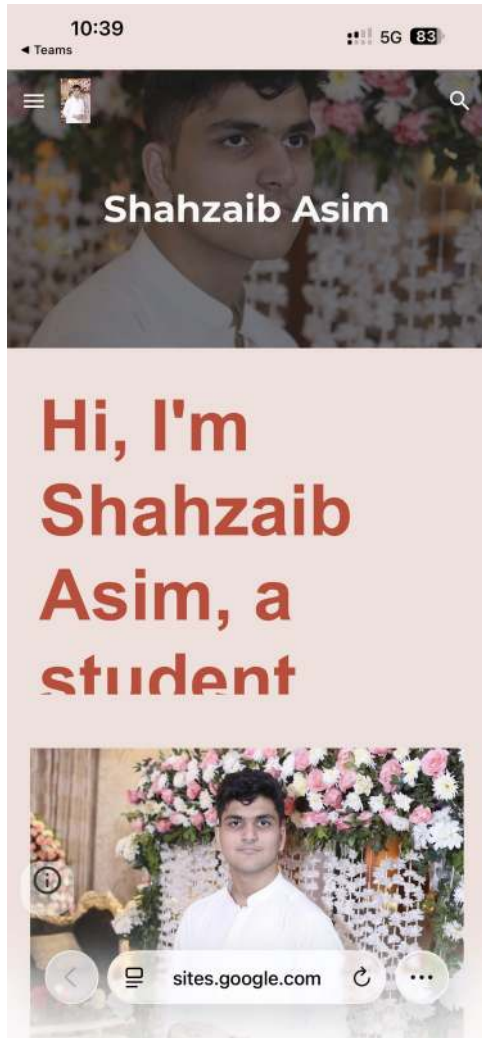

Feature: Face ID - Enabled by TrueDepth camera for facial recognition
Function: Unlocking the phone with your face.

Face ID (TrueDepth Camera) – Uses facial recognition for security. A17 Pro Chip. A very fast and powerful processor. Triple Camera System. 48MP wide, ultra-wide, and

My own work example

Assignment 1

Successful Product, my chosen product was the iPhone 15 Pro Max. In this assignment, I researched the product in detail to understand why it is successful in the technology market. I looked at the features of the phone, such as design, performance, and camera quality, and how these features meet customer needs. I also researched the target audience, pricing, and competitors to understand what makes the iPhone 15 Pro Max popular. This assignment helped me learn how research, good design, and marketing can make a product successful. It also improved my research, analysis, and understanding of how technology products succeed in business.

Assignment 2

In this assignment, I selected the Apple iPhone 18 Pro Max as a prototype technology-based product. The purpose of this work was to carry out primary and secondary market research to evaluate the product's potential success and identify possible improvements before launch.

Secondary research was used to compare the product with a key competitor, the Samsung Galaxy Ultra, focusing on features, benefits, pricing, and unique selling points. Primary research was conducted through an online survey of 10 potential customers, which identified camera quality, battery life, performance, and sustainability as key customer requirements.

Based on the research findings, justified refinements were proposed, including price adjustment, improved battery life, and optional solar charging. Overall, the research

BTEC L2

BTEC Level 2 Assignment

Unit 21: A Technology Business Learning Aim B

Student Name: Shahzaib Asim

Student Number: S2312202

Submission Date: 07/11/2025

Introduction

The selected prototype technology-based product for this project is the Apple iPhone 18 Pro Max. It symbolizes the future of innovation at the company, especially because such a device would combine advancements in smartphone technology with AI performance, sustainability, and enhancement in design. This paper will discuss the core issues of carrying out both primary and secondary market research for the product. I would review how this might perform in the global smartphone market, comparing it against a major competitor such as the Samsung Galaxy Ultra, and assessing its chances of success.

Furthermore, I plan to conduct a short survey or interview with prospective customers to ascertain which features and functions users value most. After compiling the research, I will review it and come up with suggestions for refining or improving the prototype of the iPhone 18 Pro Max to meet users' needs and market trends

1. Selecting a Product or Service

I have chosen the **Apple iPhone 18 Pro Max** as my prototype technology-based product. This device represents the next generation of Apple's iPhone series, combining new technologies such as artificial intelligence (AI), foldable design, solar-assisted charging, and an advanced A20 Bionic chip for improved performance.

I selected this idea because Apple is already a global leader in smartphone innovation, and new iPhone models always attract high customer interest and strong sales. The iPhone 18 Pro Max has a **good chance of success** because of Apple's loyal customer base, its strong brand reputation, and the rising demand for eco-friendly and AI-powered smartphones.

Global position: Apple is consistently a top 2 smartphone vendor worldwide. Demand driver: Premium buyers value camera quality, performance, security (Face ID), and the Apple ecosystem (iCloud, iMessage, App Store, Apple Music). Price & spend iPhone

Assignment 1

Successful Product, my chosen product was the iPhone 15 Pro Max. In this assignment, I researched the product in detail to understand why it is successful in the technology market. I looked at the features of the phone, such as design, performance, and camera quality, and how these features meet customer needs. I also researched the target audience, pricing, and competitors to understand what makes the iPhone 15 Pro Max popular. This assignment helped me learn how research, good design, and marketing can make a product successful. It also improved my research, analysis, and understanding of how technology products succeed in business.

Assignment 2

In this assignment, I selected the Apple iPhone 18 Pro Max as a prototype technology-based product. The purpose of this work was to carry out primary and secondary market research to evaluate the product's potential success and identify possible improvements before launch.

Secondary research was used to compare the product with a key competitor, the Samsung Galaxy Ultra, focusing on features, benefits, pricing, and unique selling points. Primary research was conducted through an online survey of 10 potential customers, which identified camera quality, battery life, performance, and sustainability as key customer requirements.

Question	Friend 1	Friend 2	Friend 3
Is the website visually appealing and professional?	Yes, the design is modern and sleek.	Yes, looks very professional and polished.	Yes, visually appealing and neat.
Is the layout easy to navigate and intuitive?	Yes, it's easy to find everything.	Yes, the layout is simple to follow.	Yes, navigation is clear and straightforward.
Do the images and videos load properly and clearly?	Yes, everything loads fine.	Yes, high-quality images and videos.	Yes, no issues with loading.
Are the interactive elements (buttons, links) working	Yes, all buttons and links work.	Yes, no issues with interactive elements.	Yes, everything is functional.

Question	Friend 1	Friend 2	Friend 3
Are the navigation links consistent across all pages?	Yes, easy to follow.	Yes, consistent.	Yes, all links work across pages.
Is the content well-organized and easy to read?	Yes, clear headings and sections.	Yes, content is neat and easy to follow.	Yes, very readable and well-structured.
Does the website provide clear calls to action (e.g., contact buttons, links)?	Yes, clear contact options	Yes, all buttons are obvious	Yes, the contact buttons stand out.
Is the website accessible to people with disabilities (e.g., text size, contrast, and alt text for images)?	No, could use better contrast.	Yes, text is readable but could improve alt text.	Yes, accessibility features work well.

BTEC Level 2 First Certificate in Information & Creative Technology

[Email](#) [Leyton Sixth Form College](#)

Comments on text for each page:

Home page:

I am a designer-developer who enjoys turning ideas into clean, interactive digital experiences. I mix simple design with solid coding to create smooth and easy-to-use products. I like clear layouts, creativity, and user-friendly flows. I enjoy solving front-end problems and turning ideas into real projects. I am studying for a BTEC Level 2 First Certificate in ICT, where I've completed several assignments that helped build my skills. This is a brief introduction for my home page to welcome users onto my digital portfolio website

This is a brief introduction for my home page to welcome users onto my digital portfolio website

About me page:

UI design and layout design HTML and CSS basic front-end development Problem-solving and debugging Working with design tools and digital documents Creativity and attention to detail

This is a brief summary of how I am and my passions etc, and it explains what I want to do In the future and what I want to do after college.

Comments on text for each page:

UNIT 1 PAGE:

This project is based on my Unit 1 exam, *The Online World*, and demonstrates my understanding of internet services, online communication, and digital safety. It shows the knowledge I developed during my BTEC ICT course.

The Online World demonstrates the knowledge I developed about online services, digital communication, and internet safety. In this unit, I learned how different online services work, how people communicate online, and how to stay safe and responsible when using the internet.

This is a brief explanation on what Unit 1 –The online world is about and what it contains.

UNIT 2 PAGE:

Technology Systems demonstrates the knowledge I developed about computer hardware, software, and how technology systems work together. In this unit, I learned about different system components such as input and output devices, storage, processors, and operating systems. I also developed an understanding of how data is processed and how technology systems are used in everyday situations.

This is a brief summary of what unit 2 – technology systems is and what the unit contains

Comments on text for each page:

UNIT 3 PAGE:

This project comes from Unit 3, *A Digital Portfolio*, where I completed several assignments to design and plan a professional portfolio website. It demonstrates my skills in organising content, creating layouts, and presenting my work clearly for employers.

This is a brief summary of what unit 3 – My digital portfolio is and what the unit contains.

UNIT 13 PAGE:

Unit 13 – Website Development includes the assignments I completed using HTML and CSS to plan, design, and develop websites. For example, I created multi-page websites with a navigation menu, header, content sections, and footer, and used CSS to control layout, colours, fonts, and spacing. I improved user experience by designing clear page structures and simple navigation so users could easily find information.

During this unit, I also developed teamwork and communication skills by discussing design ideas with classmates, receiving feedback, and making changes based on suggestions. I explained my design decisions and helped solve layout problems during group discussions. This unit helped me build strong front-end development skills, problem-solving ability, attention to detail, and the confidence to work in a team, which are all important skills for employers.

This is a brief summary about unit 13 – website development and what the unit contains

Comments on text for each page:

UNIT 18 PAGE:

In Unit 18, I created a booklet that explains the key concepts of computational thinking. The booklet focuses on how computational thinking can be used to solve problems by breaking them down into smaller, more manageable parts. It covers techniques such as decomposition, pattern recognition, abstraction, and algorithm design. The goal of this unit was to help me develop the skills to approach problems in a structured and logical way, which is essential in programming and computer science. By creating the booklet, I was able to not only showcase my understanding of these concepts but also present them in a clear and organised manner.

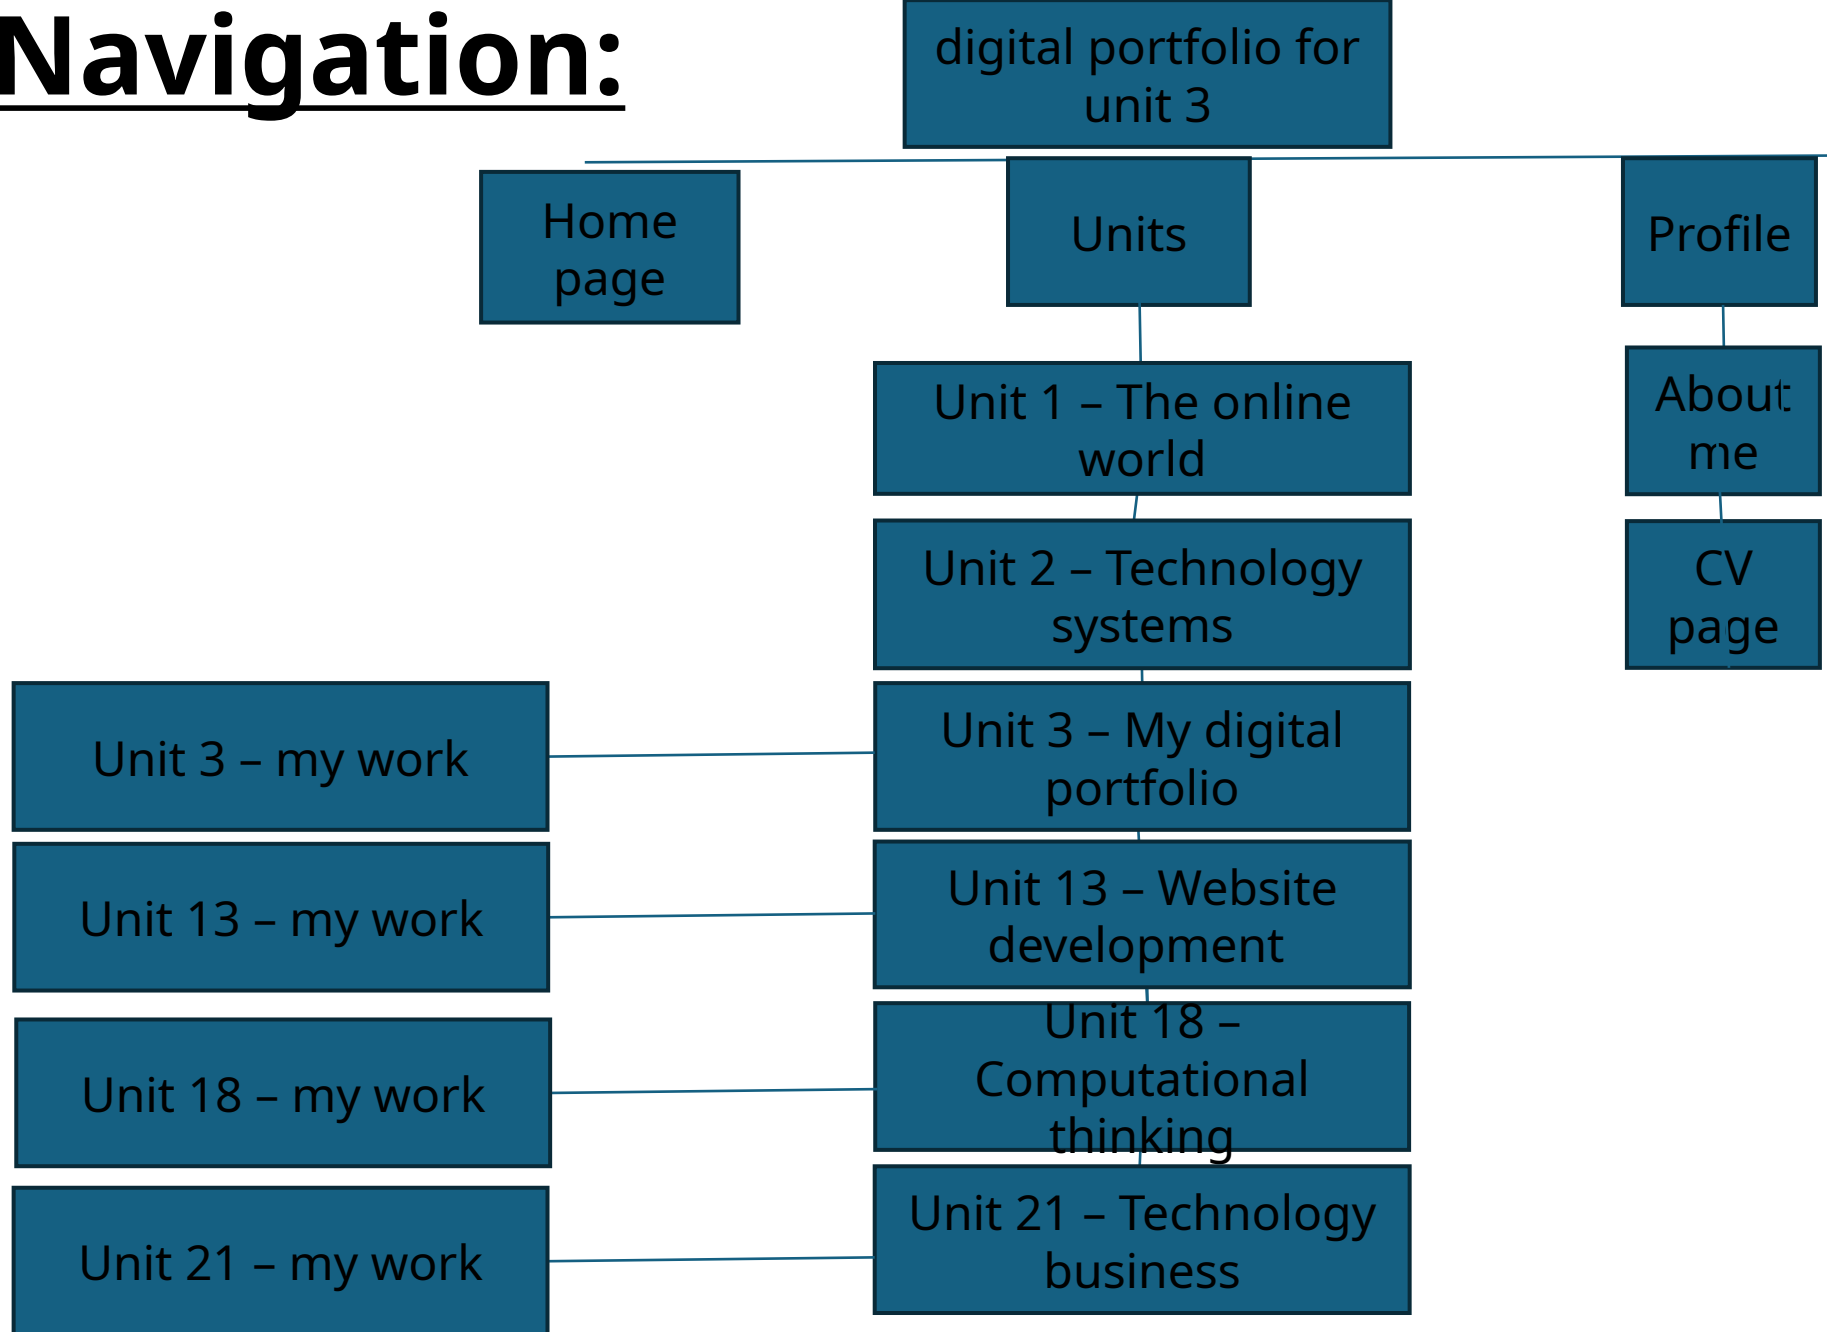

This is a brief summary of what unit 18 – computational thinking is and what the unit contains

UNIT 21 PAGE:

- Unit 21 – Technology Business focuses on the process of planning and launching a new technology business. In this unit, I researched how to develop a successful product by analysing customer needs, market trends, and business strategies.
- For Unit 21 – Technology Business, I chose the iPhone 18 Pro Max as my product idea. In this project, I researched everything about the product to understand how it could be successful in the technology market. I looked at the target customers, their needs, and what features they expect from a high-end smartphone. I also researched competitors, pricing, and marketing strategies to see how the product could stand out from other phones. This project helped me understand how technology businesses plan, design, and promote products. It also improved my research, planning, and problem-solving skills, and showed how good research can help make a technology product successful.

This is a brief summary of what unit 21 – technology business is and what the unit contains

Navigation:

- **Text:** For the text on my website, I used the Arial font with a font size of 30. I chose this because it is clear, simple, and easy to read for all users. The size is large enough so users do not struggle to read the content, which improves accessibility and user experience.
- **Images:** The images used on my website are related to each unit where possible. For some sections, it was difficult to find exact matching images, so I selected relevant images that still support the content and improve the overall appearance of the website. This helps make the website more visually engaging.
- **Layout:** The layout of my website follows my original storyboard design. However, I made some small improvements during development, such as adding more relevant images and adjusting spacing to make the pages look more professional. These changes helped improve the overall presentation and made the website easier to use.
